You guys are doing a great job, keep the good work up.

game zoom out - the game look very zoomed thats bad

I love this game

Unofficial PokéOne Guide is quite useful, but the site takes a long time, loading when in-game, but that is the problem with the pokeone app

Add possible guide to gaining trainer levels and money, with the best locations for money and exp

You can embed the images inside the cells for more flexible management. I would also like to see some improvement on the graphical side, the sheets are a bit simple in design i think.

Also there, you can have that, if you want to see how to embed images in cells or get an idea on how i would like the sheets to look more like https://drive.google.com/open?id=1DWwokdMn4Uw43dPC-Ocx01_bKdQad6op
It was initially to have the items i wanted to grab inside one easy to follow sheet so that i could grind new character quickly, but i don't play as much now so i gave up on that thing. There is a couple of items you missed in that sheet also.

Would love a way to level up post game, other than grind small quests.

hope you have a great day -zonedout

That's it, all filled in! Thank you very much for participating!
